

Thank you for purchasing a license to use this set of high-quality profiles for the Kemper-Profiling-Amp.

You can freely use this profiles to create any kind of music, soundtracks or even #1 hits or whatever you like.

As with similar products - all profiles are copyright protected by law - you do not own them - you purchased only a license to use them.

A part of your name and/or your ordering number may be stored in the profiles.

Please support our work by NOT sharing this profiles or any modifications of them.

Note:

Please make a backup of your own profiles before you install any of the profiles from this pack.

Please do not rename or modify any of the profiles with an external editor since it could crash your Kemper.

(This is true for all profiles/rigs not only for ours)

How to install?

- 1) Prepare a USB stick according to the user manual
- 2) On the USB stick you'll find a folder 'Shared' (if not - goto step 1)
- 3) Copy the profiles you like to import into this folder (do not create any subdirectories)
- 4) Import the profiles/rigs according to the user manual
- 5) You'll find your new profiles/rigs by name (starting with 'AH') or by User ('Soundside.de')

Directory '01-Raw-Profiles'
=====

Profiles of a 59' Fender Bassman Combo Tube Amp with 4x10" Jensen speaker at various level settings.

This old amp has no master volume knob - so profiling was VERY loud and the power amp and speaker distortion kicked in at higher volume levels.

The amp starts to sound at volume3 (V3) and this is the clean sound of the Bassman.

When the volume got cranked (V4, V6, V8) the amp distorted more and more. After V8 (the amp goes to 12 - were no audible changes).

This amp has two inputs a 'Normal' (N) and a 'Bright' (B) input - we profiled the amp at both settings.

Naming convention:

AH BMan Ch N V8

AH = our prefix

BMan = Fender Bassman

Ch N = Normal Channel

Ch B = Bright Channel

Vx = Volume setting

All tone controls were at a neutral (12:00) position during the profile session.
Feel free to change the sound with the KPA EQ-Block or add an EQ-Effect before
and/or after the stack

Directory '02-Mods'

=====

Here are modifications of the above profiles created by us.

Note:

You can combine the Amp or Cabinet models found in this pack with other Amp and/
or Cabinet profiles in your KPA.
