

Thank you for purchasing a license to use this set of high-quality profiles for the Kemper-Profiling-Amp.

You can freely use this profiles to create any kind of music, soundtracks or even #1 hits or whatever you like.

As with similar products - all profiles are copyright protected by law - you do not own them - you purchased only a license to use them.

A part of your name and/or your ordering number may be stored in the profiles.

Please support our work by NOT sharing this profiles or any modifications of them.

Note:

Please make a backup of your own profiles before you install any of the profiles from this pack.

Please do not rename or modify any of the profiles with an external editor since it could crash your Kemper.

(This is true for all profiles/rigs not only for ours)

How to install?

- 1) Prepare a USB stick according to the user manual
- 2) On the USB stick you'll find a folder 'Shared' (if not - goto step 1)
- 3) Copy the profiles you like to import into this folder (do not create any subdirectories)
- 4) Import the profiles/rigs according to the user manual
- 5) You'll find your new profiles/rigs by name (starting with 'AH') or by User ('Soundside.de')

This are profiles of a Vintage Silverface Fender Concert Amp, model AB763, dated 1964 with 4x10" speakers.

This great old amp was profiled at various level and tone control settings. Yes, it was way loud - since this amp has no master volume!

As with all (old) Fender amps - the amp loves (Fender) single coil guitars best.

Directory '01-Raw-Profiles'

=====

Profiles captured with a Royer R121 far miked.

The numbers are the knob values of the used settings.

e.g.

AH Concert 1.5 9 7

AH = our signature

Concert = Concert Pack

B = Bright channel used

1. number = Amp volume (1.5=clean, M=max)

2. number = Amp trebble (3=dark, M=max)

3. number = Amp volume (7= medium) - please use KPA knobs to adjust to your taste

Directory '02-Mods'

=====

Here are some modifications of the above profiles created by us.
