

Thank you for purchasing a license to use this set of high-quality profiles for the Kemper-Profiling-Amp.

You can freely use this profiles to create any kind of music, soundtracks or even #1 hits or whatever you like.

As with similar products - all profiles are copyright protected by law - you do not own them - you purchased only a license to use them.

A part of your name and/or your ordering number may be stored in the profiles.

Please support our work by NOT sharing this profiles or any modifications of them.

Note:

Please make a backup of your own profiles before you install any of the profiles from this pack.

Please do not rename or modify any of the profiles with an external editor since it could crash your Kemper.

(This is true for all profiles/rigs not only for ours)

How to install?

- 1) Prepare a USB stick according to the user manual
- 2) On the USB stick you'll find a folder 'Shared' (if not - goto step 1)
- 3) Copy the profiles you like to import into this folder (do not create any subdirectories)
- 4) Import the profiles/rigs according to the user manual
- 5) You'll find your new profiles/rigs by name (starting with 'AH') or by User ('Soundside.de')

Profiles of a Koch Studiotone at various level settings - far miked to get the "in the room" sound.

This profiles were created at gig level - yes it was VERY loud and the power amp distortion may kicked in.

Feel free to add effects to your liking.

The Koch has 2 channels and a switchable 'DrivePlus' for the Drive channel

We name it like this:

C1 = Channel 1 (Clean)

C2 = Channel 2 (Drive)

C3 = Channel 2 (Drive Plus) extra drive stage (H=High boost was used all the time)

All settings not mentioned are at 12:00

Directory '01-Raw-Profiles-Ch1'

=====

Koch C1 M42B is a clean setting

Koch = Koch Studiotone

C1 = Channel1 (clean)

1. number = Amp bass (0-Max)

2. number = Amp mid (0-Max)
