

How to install the Soundside.de VK8UpgradePack
(Last Update: Feb,14 2004)

Tools Needed:

1. VK-8 / VK-8-M
2. Midifile form the VK8UpgradePack

Note: To get all new features and patches use the file 'All-System&Bank456.mid'. Please check the file 'Files.txt' to see the other options.

3. MIDI Cable
4. Sequencer capable of playing SMF data

Note: If you do not own a sequencer program please download this free tool from the roland webpage.

<http://www.rolandus.com/support/genappstools/bin/smfplayr.zip>

Procedure:

Note: *Never disconnect the power until updating is completed.*

1. Connect the MIDI Out of the sequencer to the MIDI In of the VK-8 / VK-8-M
2. Play back the MIDI file

Note: *The ROTARY ON button's LED will flash indicating the MIDI data is being received.*

3. Once all data have been received, all the LEDs will light up
4. Turn power Off
5. Power On the unit normally to complete the update.

Note: *If a problem occurs during the update, it may be necessary to perform update procedure again.*
